.... What could possibly go wrong?

Protecting Your Organisation. Managing the Insider Threat

This one day course reviews social engineering tactics and opportunities to detect deception and considers the motivation of insiders and the threats they pose to the organisation.

A review of values fit and expected behaviours, whistle blowers and the raising of concerns will be conducted. Issues around continual risk assessment and the tackling of issues during probationary reviews are fully covered.

Raising of overall security awareness is the primary output of this module.

This course is interactive with opportunities to participate and discuss specific areas of interest and is facilitated by experienced trainers.

This one day module is the third of the **Hire Me** programme courses, the first is the [Assessing Risk and Refining the Selection Process](#) and the second is the [Advanced Interview Skills](#) module.

For more information on this module or any of the other courses visit www.agendalifesciences.co.uk or email hello@agendalifesciences.co.uk.
