

agenda facilities management

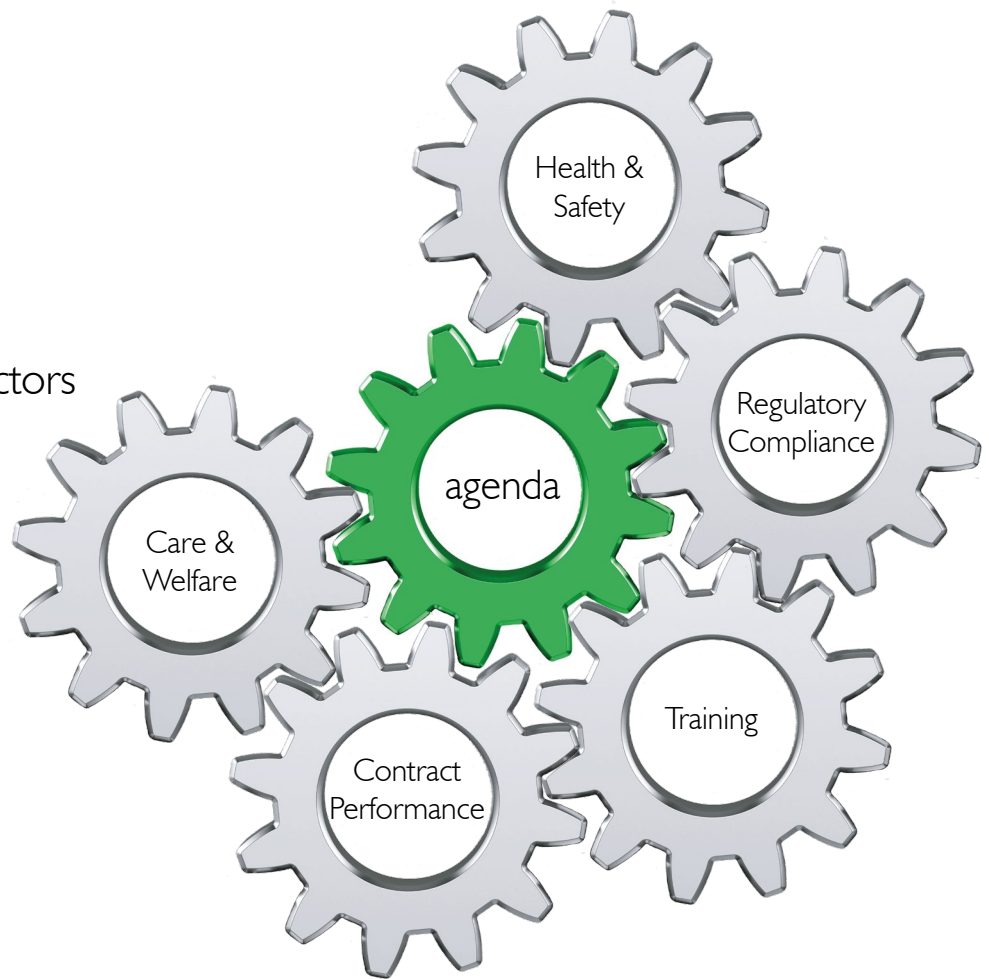

creating the right environment

facilities management

why...

Mitigation of all the risk factors

We understand the evolving nature of research and development within the laboratory animal industry and will ensure we deliver the right solution for you, using set metrics.

Category	Percentage of Total Score
Care and welfare (includes husbandry and facility management)	40%
Regulatory Compliance	30%
Health and Safety	10%
Training (Development of the staff)	10%
Contract Performance	10%

We believe in developing a collaborative approach that fits with your culture, ensuring that standards are adhered to and the internal Agenda team take on a role of governance and oversight as well as managing the day-to-day operations.

how...

Risk mitigation

1. Compliance
2. Business contingency plan
3. Performance Management

Improve facility reputation

1. Improve research experience
2. Deliver quality
3. Heighten responsibility

Improve financial position

1. Increase flexibility of workforce
2. Employee productivity
3. Enhanced procurement savings

Understanding that research and development programmes change, we manage facilities to ensure and appropriate number of well trained staff are available at all times.

Based around key issues such as Animal Welfare, Home Office compliance and health and safety, we can provide advice on the best Key Performance Indicators for your facility.

No other company has a greater understanding of facility users' needs and the ethical, legal and regulatory requirements that govern the operations.

Whether you need help designing, project managing and commissioning your research facility, assistance with operational policies, review of procurement activities, workflow and capacity management or a part or full facility management solution, choose Agenda to be your trusted partner and to provide you with a professional quality-based service.

Placing the day-to-day management of your facility in Agenda's experienced hands will save you valuable time to focus on core research issues.
